Mayor denies Liberal leader's charge city assessments not up

Mayor J. J. Ladd today denied charges made by Liberal Leader Arthur Laing that Kelowna was not reassessed for taxation purposes as were all other municipalities. Speaking at a recent political meeting, Mr. Laing stated that Premier Bennett had issued instructions to this effect.

Mission youth graduates from U.S. college

Graduating from Western States College of Chiropractic and Naturopathy, Portland, Oregon, Dr. R. P. Kuipers, D.C., N.C., B.T.S., son of Mr. and Mrs. M. L. Kuipers, of Okanagan Mission, has returned to his home for a brief stay before going to Vancouver for further study, and to qualify for his Canadian exams.

Growing up here, where he took his elementary and high school studies, Dr. Kuipers attended UBC for a short time, before transferring to his choice of a profession at Western States College, where he has completed a four-year course, plus a summer course. Dr. Kuipers plans to establish himself in Kelowna as a naturopath.

"It's untrue, and to say that Mr. Bennett favored us is ridiculous. I wish Mr. Laing would check his figures more closely before making such statements on a public platform."

The mayor pointed out that Kelowna had completely reassessed residential buildings in 1953, on approximately 50 percent level of value. The government order later came through before the 1954 tax roll was made up. Overall, the increase ranged approximately 15 to 17 percent.

REALISTIC VALUE
Mr. Ladd said the government gave the city a reassessment factor for this year's tax roll, and that local assessments were based on 60 percent of realistic value.

At Kamloops, Liberal leader Laing said when the first assessment was put out, the premier asked for a review. The assessment was then up about 12 percent. In the review, it was found that the assessment should have been only up 9.8 percent. Mr. Laing charged that Premier Bennett then requested that since the increase was under ten percent, taxes shouldn't be raised at all.

Shriners present colorful parade

Plenty of costume, pageantry and music marked the two-day convention of more than 1500 B.C. and Washington Shriners, held in Kelowna on Friday and Saturday. Gizeh Temple Shrine from Vancouver supplied the bulk of the entertainment, with the local club taking care of the details of administration. Above, the brass band from Gizeh Temple is caught in the act of changing their music preparatory to playing another number.

Colorful parades, ceremony and pageantry highlight two-day Shrine convention

Two days of pageantry, ceremony, laughter, drums and shotgun blasts were on the bill of fare served up by the Nobles of the province's Shrine clubs, 1,500 whom invaded Kelowna on Friday and Saturday for the Regatta City Convention.

The ceremonies, as far as the general public were concerned, started with a stirring and colorful parade down Bernard Avenue on Friday night, and ended with a pageant in the arena on Saturday night.

In between times, the Shrine members conducted their business, which included the initiation of a number of Shrine Noble aspirants.

Heralded by three nobles, playing four-foot trumpets, used by the nobles in history, the parade formed up at the Armories and marched down Bernard to City Park, where they held a concert at the Jubilee Bowl.

COMEDY RELIEF
With brilliantly colored uniforms, smartly marching feet, and gay music, the Gizeh Temple Shrine band, choralists, drill team, oriental band, and pipe band supplied the pageantry of the parade.

Comedy relief was supplied by a number of clowns and some specialty acts, most unique of which was a long vehicle in four sections, a plumber's nightmare. Pulled by a motor scooter, the entry of the Kamloops Shrine club weaved and circled its way along the parade route to the accompaniment of explosions, sirens and bells.

A confetti fire engine from Chelan, Washington, pursued its circuit way along the route, also accompanied by sirens and king-sized shotgun blasts. A jeep and trailer from the Gizeh Temple, and a number of clowns kept up the spirit of revelry.

The piece de resistance of the parade was the appearance of a long and bedraggled line of initiates, pulling on a long rope that "towed" a truck bearing a pipe organ.

EVENING SHOW
The concert in the park was followed by another parade to dis-

sal points, and the pipe organ could be heard more than three miles out in history, the parade formed up at the Armories and marched down Bernard to City Park, where they held a concert at the Jubilee Bowl.

HEAD FOR HOME
Sunday morning there were a few social get-togethers, and the three Nobles headed for home. Most of Vancouver men arrived and left in a convoy, with more than 200 automobiles and buses in the group. All Shriners were greeted at Peachland and given detailed instructions as to their accommodations, and the city's facilities, with emphasis on the forthcoming Regatta.

QUIET WEEKEND
Although there were more than 1500 merrymaking Shriners in town over the weekend, RCMP this morning reported the traffic situation as good, with no accidents reported.

Liberal leader criticizes gov'ts policy of borrowing money to pay off interest

Premier W. A. C. Bennett has gone to the U.S. to borrow 40-million dollars, but, by the time he gets back, he will only have 27-million to spend.

This was charged by B.C. Liberal party leader, Arthur Laing, speaking to members of the Kelowna Liberal Association here Thursday night.

Mr. Laing said 13 of the 40 million will immediately go to pay off the 3 1/2 per cent interest on treasury bills and bank debentures incurred by the government.

"Mr. Bennett should not borrow 40 million, but 44 million, the extra four million being to pay off the interest on the borrowed amount," the speaker opined.

"The premier," he stated, "is saying, 'Times in B.C. have never been so good as they are under the present administration.' 'If conditions are so good, why are taxes going up, instead of down. Also, just then, David Sturdy, presented Attorney why should the premier have to borrow money?'"

GENERAL ELECTION
There was a provincial election in 1949, another in 1952, and still another in 1953. And now there is talk of a general election this year. Bonner labelled the information "Why," questioned the speaker, "should there be four general elections within seven years, when 10 years is the usual cycle for that Summer resigned his post in the period of time?"

Vegetable probe now underway

Full scale investigation into the vegetable industry has got underway. Probe is being carried out under the direction of Dr. W. J. Anderson, head of the department of agricultural economics at UBC. E. L. Menzie and J. B. Moen are currently in the area, and will be calling on growers and shippers during the next few months. Mr. Menzie is an instructor with the department of agriculture economics at UBC, and Mr. Moen is an economist for the markets branch, department of agriculture, Victoria.

Field work is expected to be completed by September, following which an analysis will be carried out both in Victoria and at the university.

Investigation has been ordered by the provincial minister of agriculture at the request of vegetable growers. B.C. Interior Vegetable Marketing Board has made available to the investigators a list of growers, figures on acreage under production, quantities marketed and prices received for produce.

FREE SWIMMING CLASSES
Registration for the free swimming classes at the Aquatic will take place June 22-23 from 10 a.m. to 5 p.m. Classes will get underway June 25.

Local UBC students win awards

Kelowna students earned more than \$1,600 of the \$50,000 in scholarship awards, announced Friday by the University of British Columbia.

Norman Joseph Gri received the largest award of the Kelowna students, the \$500 Union Carbide of Canada award, given for proficiency in undergraduate studies.

John Dee Logie topped two of the smaller awards, both in commerce. First was the Gault Brothers Limited Scholarship for proficiency in commerce, \$300. Second was the Woodward Scholarship for highest standing in advertising and marketing, \$125. Last October, John, who is 21, and proceeding into fourth year studies, won the Aristotle Cookware \$100 scholarship for general proficiency.

Sidney Wayne Hubble also received two awards. The Vancouver Sun Scholarship for proficiency in undergraduate studies, \$400, and The Vancouver Women's Canadian Club Scholarship for proficiency in Canadian History.

The \$250 Pilmsoll Club Scholarship for proficiency in Commerce was given Mary Ann Shelley.

Traffic should be moving across Lake Okanagan bridge early in 1958. This was predicted by Col. W. G. Swan, head of the consulting engineering firm of Swan, Wooster and Partners, who is in the city making a first hand inspection of the project which is moving along on schedule. He made the statement in an interview with this newspaper.

Col. Swan emphasized that the City Park site was the only practical location, and that when the bridge is completed, it will not detract from the beauty of the park. The only alternative site was at Poplar Point, but investigations disclosed the crossing would have been 50 per cent longer with no bottom at the 400 foot depth, not far from the shore.

He explained that the various types of construction considered on the west side were a suspension bridge at an approximate cost of \$9,000,000; a rock-filled causeway with a vertical lift bridge moveable span at approximately \$8,000,000, and a floating bridge at around \$5,000,000.

ONLY SOLUTION
"On the advice of the firm's consultant, Charles Andrew, designer of the Lake Washington bridge, an all-floating or pontoon bridge was discarded because of ice conditions. A rock-filled causeway was found unsuitable due to the great load which would be placed on the bed of the lake with a rock fill of 200 feet of maximum height, which from the study of borings, it was concluded it could not safely carry."

"This left the suspension bridge as the only apparent solution, and accordingly the design was put in hand and almost completed, when, with the continuation of the borings, it was found at depth on the Westbank shore the favorable stratum of sand and silt was underlain by soil which would not safely support the west anchor pier of the suspension span."

"The studies indicated that there would be inevitably some movement of the anchor pier under full cable strain; that a forward movement of as little as 12 inches would correspond to a drop of five feet at the middle of the main span. This plan was accordingly discarded."

Had there not been some urgency in the case of this project, no doubt the borings would have been completed and the design of the suspension would not have gone beyond the preliminary stage."

MODIFIED PLAN
However, Col. Swan explained that the toll bridge authority was not involved in the cost of the design of the suspension bridge.

"It became necessary to find the answer to this crossing by the adoption of some modified plan," the engineer continued. The ultimate result after conferences between the Swan firm, consultant Andrew and the bridge department at Victoria resulted in the present adopted design.

The crossing of the lake as now being constructed, consists of 1,500 George, which was attended by a five-man Kelowna delegation, 2,200 feet on pontoon bridge; 300 feet of vertical lift bridge; 300 feet of causeway on the Kelowna shore, in addition to highway connections

and embanked with a cement curb. All preparatory work on the bridge has been completed, and the pedestrian underpass ready for use. Only work remaining is the black-topping, and machinery was scheduled to move in today.

The lawn bowling club house has been remodelled, and the exterior matches the new aquatic club building. Some seats in front of Jubilee Bowl have been set out.

One major improvement is the removal of the cement posts at the Lawrence Avenue park entrance. These will be replaced with a four-entry department-type of entrance.

The oval has also been changed. The Cinder track has been completed, and the new \$11,550 addition to the grandstand in city park is expected to be completed within a few days. This picture taken Friday shows the last work being done on the seats. Work on the roof started today.

1957 Jaycee parley will be held here

The 1957 convention of the British Columbia and Yukon Junior Chamber of Commerce, will be held in Kelowna. No tentative dates have as yet been set. This was announced at the conclusion of the three-day Jaycee convention held in Prince Elton Harwood of Burnaby. Gil Thom, of Duncan, will fill the vice-presidency.

Park undergoes many changes

If you haven't been down to the City Park for a month or so, and you still remember it as being cluttered up with men and machinery, cutting down trees, you're in for a big surprise.

The \$11,550 addition to the grandstand is expected to be completed this week. Contractors Lupton-Ahrens have 19 men working on the job. New addition will provide seating for around 500 persons.

The areas torn up by machinery, have been filled in with topsoil, and already grass is shooting up. The oval has also been changed. The Cinder track has been completed, and the new \$11,550 addition to the grandstand in city park is expected to be completed within a few days. This picture taken Friday shows the last work being done on the seats. Work on the roof started today.

Three Kelowna beauties contest Osoyoos crown

Two contestants for this year's Lady-of-the-Lake contest, Doreen Serwa and Marilyn Rolph, as well as last year's winner, Jeryl Wilson, will travel to the Osoyoos Cherry Carnival, July 2 to take part in a carnival-sponsored bathing beauty contest.

A letter received from the carnival committee asked that as many girls from Kelowna as possible, aged 18-25 participate. Unfortunately, most of the contestants are under 18 and thus Kelowna is unable to send more than the three girls.

Park road ready for blacktopping

New roadway in the City Park is now ready for blacktopping, according to Ald. Maurice Melke. The work will be done by a Penetion firm.

Regarding other road projects, he said St. Paul Street is planned for dust bay as well as Richter and the east end of Lawrence. Christleton and Cawston avenues are now being primed in preparation for dust bay material. Leon Avenue, east of Ethel Street, is also being prepared for dust bay. Birch Avenue is being dug out and Francis is next on the list. Bernard Avenue sidewalks have been completed.

Vacation time almost here for pupils

Local students are already reciting that little duty "... no more teachers, no more ..." as they look forward to vacation time.

Around 4500 elementary, junior and senior high school students in Kelowna and district, will leave class rooms the latter part of June. Closing date for elementary and junior high school students is June 29. Many senior high pupils who have been recommended, will finish on June 22. Others who have to write one or two exams, will go back for the morning or afternoon, depending on the date set for the examination.

Estimate Blue Bird Bay water system will cost approximately \$38,000

Work on installing a domestic water system in the Okanagan Mission area is expected to get underway in the near future. Plans call for construction of a 20,000 gallon water tower in the vicinity of the Blue Bird Bay, and will cover the area between CKOV transmitter station, and Parat Road.

Job Johnston was elected chairman of the Blue Bird Bay Water District. Other trustees are A. V. Nash, Anthony Hackle, while secretary-treasurer is N. T. Apsey. It is estimated the system will cost \$38,000, and it will be financed through the sale of debentures, guaranteed by the provincial government.

Engineers' report is almost completed, and when it is approved by the provincial government, tenders will be called. It is planned to construct a 100-foot high water tower on the Thompson property.

FIRE BRIGADE
Mr. Johnston stated that after the system is installed, it is planned to set up a volunteer fire brigade. Provision will be made for nine upright outlets for fire fighting purposes. He pointed out that with the equipment available, there would probably be a reduction in insurance rates.

Application forms will be mailed to residents in the area within the next week or ten days. After the

Legion band will attend dam opening

Members of the Canadian Legion Pipe Band have been invited to attend the official opening of the Chief Joseph Dam at Bridgeport, Wash., on Tuesday.

Special invitation for the expense-paid trip was extended to the local aggregation by the dam reception committee. The Legionnaires will be the lone Okanagan representatives.

Invitation was also extended to the Kelowna Board of Trade, but was declined as it was inconvenient for a member of the executive to attend.

Traffic jams

There are times when it seems to me that we blame the automobile for a lot of things for which it is not entirely responsible.

Take, for instance, traffic jams. We blame the automobile for traffic jams when in actual fact we had traffic jams long before we had automobiles.

In the days of the horsedrawn vehicles, there were traffic jams comparable to those today in every large city. And the traffic police with their helmets and clubs were at every intersection.

I've read more than once about the breweries' delivery wagons with their four and six-horse teams blocking the streets of New York.

The horse suffered in warm and in cold weather. In hot weather he suffered a variety of heat prostrations and in winter he slipped on the ice. And if it rained and then froze his body was covered with him and his hooves encased in ice.

When a horse failed or the vehicles had their wheels locked as often happened, traffic jams resulted, and the police worked valiantly, sometimes for hours, to untangle the mess.

Horse accidents were common, and serious, both for riders and drivers. Then there were the runaways, for

the horse is an emotional animal and will run away when he sees an umbrella or a newspaper being blown down the street. When he sees an elephant in a circus parade, he goes quite insane.

The traffic consisted of hansom cabs, one-horse vehicles with driver on top, broughams, which the high-toned folks rode in; stanhopes, with the coachman on a rumble seat while his master or mistress sat in the driving, elegant landaus, and the ubiquitous buggies.

The traffic jam could be much more interesting than one today. I remember one when I was a kid on a visit to Toronto. It seemed that somewhere in the traffic was a stallion. He had raised his head and looked around and whinnied. The drivers lost control of their horses. The stallion would not go on. The mares would not go on.

I stood on the curb pop-eyed and watched the police yell instructions to the drivers who could not obey them. The police blew their whistles. The mares and stallion whinnied harder than ever. Drivers of the wagons used the most awful language. Ladies in the carriages stopped their cars or covered their faces.

What a charming sight it was! A traffic jam caused by romance. How cold and unromantic by comparison are our traffic jams today.

Who remembers when?

From the files of The Kelowna Courier

FIFTY YEARS AGO—1906

At meetings of city council held on May 15 and 16, several important bylaws received consideration and were advanced a stage. Exemption of the new mill site of the Kelowna Saw Mill Co., from taxation for ten years was provided by one of the bylaws, in consideration of the company moving the location of its mill, to be erected to replace that recently destroyed by fire, further to the north than its site and placing its Bernard Avenue frontage on the market as business property.

The Board of Trade application for a charter has been completed and sent to Ottawa. Thirty-three names were obtained without much difficulty, although the charter members are restricted to merchants, trades, brokers, mechanics, manufacturers, managers of banks and insurance agents. When the charter is granted and organization completed, it is to be hoped that people of all other occupations will join the board and give every possible assistance towards furthering its work.

Forty years ago—1916
A communication sent out for purposes of publication from the Department of Lands at Victoria, about the middle of last week, and received by the Courier on Saturday, states: "A hot and dry wind from the south is drying up the vegetation in the Okanagan and Similkameen districts, while hot weather prevails through the Vernon district generally."

Owing to the financial stringency brought about by war conditions, the estimates of the Board of Works department of the city council for the year 1916 totalled the sum of \$2,000. It was divided as follows: Graveling Cayton Avenue, \$150; graveling Water Street, \$150; grading and graveling Penzance Street from Bernard Ave. to Mill Creek, \$150; general repairs and graveling, \$300; sidewalk repairs, \$500; total, \$1,500.

Thirty years ago—1926
The death is recorded as having taken place on May 18 of William Dalgleish Hobson, of Okanagan Mission, aged fifty-eight, for thirty-five years one of the most prominent and respected residents of the district.

A party of CNR officials visited Kelowna on May 13 to witness the commencement of work in earnest upon the hull of the new vessel for lake service.

On Monday, D. H. Hattenbury, registrar of voters, added 304 names to the voters' list of the South Okanagan constituency. However 305 names had to be struck off the list, permit under "rooms for rent."

Level of Okanagan Lake has risen another four inches in the past week and it now stands at 103 feet, six inches above the agreed maximum, but all streams pouring into it have gone down considerably.

J. R. J. Stirling of East Kelowna was elected president of the BCFGA on Tuesday, succeeding Gordon DesBrisay, of Penticton, who had held the post for the past five years.

Level of Okanagan Lake has risen another four inches in the past week and it now stands at 103 feet, six inches above the agreed maximum, but all streams pouring into it have gone down considerably.

When the Victorian poet, Robert Browning wrote "ab, but a man's reach should not exceed his grasp or what's a heaven for," he expressed the thought that with each achievement one's aims and ambitions should be that much higher. Nearly six years ago we entered high school with such simple ambition as to get on the football team, to get a high mark in math, to meet all the good looking boys or girls and as a final goal to reach graduation. Graduation has been a goal but finally an achievement and with it our goals are set to the next stage in life.

Today marks the completion of high school I should say, it actually marks the beginning of that nerve-wracking fourth called examinations, but it is symbolic of the end of high school and opens the door to

TWENTY YEARS AGO—1936

Kelowna sportsman, Ralph Brown, has become the first angler to be eligible for the gold button of the OK Big Fish Club, which was recently organized. The big trout was caught on Wednesday, May 12, weighed 16 pounds, 6 oz.

Rutland won the championship for the second time in the eight years during which the event has been held, at the Central Okanagan Rural Schools' Track Meet, which took place in the Kelowna City Park.

The Brewster cup, annual trophy for which lady members of Okanagan golf clubs compete, was won on the Kelowna course, by Mrs. A. McClymont, with Mrs. J. H. Broad, runner-up.

Ten years ago—1946
As Okanagan fruit growers daily watch the fruit forming on the trees, and with little or no assurance that fruit containers will be available to harvest millions of dollars' worth of produce, orchardists are looking toward Vancouver and Victoria in the hope that some agreement can be made between lumber operators and the striking members of the IWA.

J. R. J. Stirling of East Kelowna was elected president of the BCFGA on Tuesday, succeeding Gordon DesBrisay, of Penticton, who had held the post for the past five years.

Civil defence in rural areas

Tenth in a series of 24 articles

The airplane is blamed for bringing war to the civilian population of countries. In the past, the cities were considered the only areas in real danger. The hydrogen bomb, however unimaginable the idea may be, has extended this threat to even the most remote farm.

It is this vast, almost unbelievable new danger that has posed the two main problems before Canada's civil defence planners: how to save the population of the cities and how to save the rest of the population. The only answer for cities is evacuation. The main solution for rural people is to provide adequate shelter.

The farmer's chief danger from an H-bomb attack arises from its radioactive fall-out, the dust of pulverized cities that settles over large areas following the blast. This danger extends not only to the farmer and his family but to his livestock and even his crops as well.

There are ways to guard against this fall-out danger. The first step is to be warned in time that it is coming. This can only be done effectively through a well-organized civil defence system that takes in every farmer in the district.

It is impossible to predict the size and location of a fall-out area until a bomb is dropped. It is important, therefore, to know every protective measure that can be taken before such a disaster takes place. This is one case in which ignorance would be anything but bliss. That is why civil defence has become as important to the farmer as to any other citizen: civil defence training can provide the farmer with knowledge that is power to protect himself.

Radioactive fall-out can contaminate animals, crops and unpackaged foods. It can contaminate houses, cars, yards and fields. It can contaminate water supplies so that they should not be used until they are decontaminated.

The only safe thing to do if fall-out occurs is to take shelter. The actual strength of the shelter is not as important. The material and the thickness of the walls and roof determine the degree of protection.

A farmer can provide his stock protection by keeping them in the barn. Since the danger from fall-out might last 48 hours or more, this means someone should stay in the barn all this time to avoid walking back and forth from the house for feeding and watering.

It is necessary, too, that means of ejection in the fall-out be available. Or that information on its danger be available from radiation detection units in the nearest village or town so that a farm family will know when it is safe to come out again. Civil defence planning before such disaster comes is the only company's responsibility, then let means of assuring the farmer this help his city neighbors, too, so that his place in civil defence is not just personally investigated the matter.

The farmer may be called on to help his city neighbors, too, so that his place in civil defence is not just personally investigated the matter.

Civil defence notebook

To learn how he may help himself but also how to help others less fortunate in disaster.

If large cities are wiped out, his crops and livestock, his milk and eggs and butter would become a vital necessity to the life of the whole country. His supplies would be needed to help feed the refugees from the cities. His house and even his outbuildings may be needed to help shelter them. Even his machinery, his tractors, trucks and even horses, if he has them, could be urgently useful. But they would be useless if he was caught unprepared and all was contaminated. And dead farmers, themselves, are notoriously useless.

Civil defence in Canada, to achieve maximum results, must extend to every community. It must be a small, F. F. Worthington, Federal Civil Defence Co-ordinator, has said. It is being organized, as a result, on an area basis comprising a number of towns and communities.

And, said the Co-ordinator, "It must also embrace means of preparing and warning farmers in isolated places."

And, said the Co-ordinator, "It must also embrace means of preparing and warning farmers in isolated places."

Letters to the Editor

DRUG STORE HOURS

Editor, Kelowna Courier

Dear Sir:

A couple of days ago I read that four out of five drug stores had voted on keeping their same hours as they have done in the past.

The one and only person who did not vote or rather decided not to go in with their idea, was perhaps a little more progressive. Someone who was looking to Kelowna's future tourist trade as well as the community development. I am perhaps not the only person who has been stopped in town during a holiday or evening to find out if there is one drug store open, and having to say no, the reply has been, "What kind of a town is this?"

In one case I took a person home to help them out. If such things as this go on why bother to modernize and keep up with the times? If staff hours can be arranged to fit the working hours for holidays, why have Kelowna's city streets should allow any development to remain open. It isn't always the city park, the beer parlors or cocktail lounges that are so important. I agree they help; our scenery is grand, but it isn't always what the tourist wants.

KELOWNAITE

LOTS OF WATER

To the Editor, Kelowna Courier

Dear Sir:

On the front page of the Courier dated June 3, an article appears under the following headlines: "Steady rain brings relief to parched orchard lands."

To strangers in our district this conveys an entirely erroneous impression as our orchard lands are not dependent upon rain for moisture. If such was the case we would not have any orchards.

For every acre of orchard land throughout the district there is an adequate supply of irrigation water available therefore there is no occasion for any orchard lands to be parched.

Yours truly,

H. C. S. COLLETT
Vice-President, B.C. Association of Irrigation Districts

From the B.C. capital

By The Canadian Press

Nearly the entire British Columbia cabinet moves into Saskatchewan this week to take part in the prairie province's election June 20.

They left with a charge from Progressive Conservative leader Deane Finlayson still ringing in their ears. In an address to a party meeting in Vancouver, Mr. Finlayson said that Social Credit in Saskatchewan has a \$250,000 campaign fund financed by the governments of Alberta and British Columbia.

He said there are at least 15 Social Credit organizers in the CCF-governed province.

Trade Minister Ralph Chetwynd will be the only B.C. cabinet minister remaining in Victoria. Premier Bennett will join his fellow ministers in Saskatchewan toward the end of the campaign.

Arthur Laing, provincial Liberal leader returned to Victoria last week from a speaking tour through the southern interior.

He claimed that a survey of voters in the capital which indicated majority support for the government was made by a United States organization known as the Washington public poll.

"I think the Social Credit party paid for it," Mr. Laing said in an interview, "but as yet I have no proof."

The poll was described as an independent survey by Premier Bennett at his press conference May 2. He declined to answer further questions about it.

It was reported later the straw vote indicated Social Credit would win 53 percent of the votes in the greater Victoria area if a provincial election were called. It was not known how many persons were questioned.

The Liberal leader said he talked to a man in Vancouver who was interviewed by the Washington public poll.

"He was told that the survey was being made for the benefit of B.C. newspapers and radio stations. I am convinced this is untrue. For one thing the questions were obviously loaded in favor of the government."

It was not an impartial survey," Mr. Laing completed his interior tour in Trail, he said he will tell all about the Summers-Sturdy case if Premier Bennett calls an election before investigating the affair.

It was not an impartial survey," Mr. Laing completed his interior tour in Trail, he said he will tell all about the Summers-Sturdy case if Premier Bennett calls an election before investigating the affair.

A broken, useless reed

The Senate last week showed itself to be a broken, useless reed when it failed to perform its proper function in the pipeline debate. If anything was needed to drive home the point that the Senate no longer performs any useful function, the Canadian public last week was given a perfect object lesson.

The Senate, by design and tradition safely removed from the turmoil of electoral politics, is that part of Parliament where sober "second thoughts" are applied to legislation coming forward from the House of Commons. It was to be hoped, fervently, that the Upper House would faithfully perform its historic function and apply some sober second thought to the pipeline discussion. It can scarcely be said that the legislation received much in the way of sober first thought in the chaos and bedlam which marked its consideration in the Commons.

The responsibility on the Senate, therefore, was that much greater. And it was not only the pipeline which was at stake. It could well be that the very existence of the Senate was just as much at stake. It is no secret that a large segment of the Canadian population has not for some considerable time held the Senate in any high regard. There has been a continuous murmur of demand

that it be abolished. The Upper House costs the country more than a million dollars a year in indemnities alone and Canadians like to get something for their money.

Last week, perhaps more than any time in this century, the Senate had the opportunity to redeem itself gloriously in the eyes of the public and to silence its critics. It could have stood up for Canada and refused to be railroaded into rubber stamping the controversial legislation. It could have insisted that it examine the legislation in detail, demanding and getting answers to many questions which the government has not bothered to answer.

But the Senate did not perform its historic function and made no attempt to do so. It accepted the government's dictation and allowed its rules to be suspended so it could give approval in short order to the legislation, as the government wished. In so doing it demonstrated that it is not what it is supposed to be. It demonstrated clearly that it is what many people have claimed it to be, merely a slave of the government willing to accept the gag and slavishly do the government's bidding. By its action last week the Senate indicated clearly that it performs no useful function in our government procedure. It may well have signed its own death warrant.

Boundary waters

A joint Canadian-U.S. study of the control and use of waters flowing across the international boundary has been in the wind for some time. The need for clarification on these points became evident when the Kaiser firm's plans to increase hydro power potential on the American section of the Columbia River by building a storage dam upstream in British Columbia were blocked by the Canadian government. Similar conflicts over water use have cropped up with respect to the Waterton and Belly rivers in Alberta, the St. John river in the east and

Your favorite movie star's smile beams three times as clear and bright from an aluminum screen recently developed for outdoor theatres.

The new screen has won the praise of both audiences and owners. Little wonder the latter like it: one operator reports his receipts increased by \$40,000 in two months after he replaced his conventional screen with the highly reflective, weather-proof aluminum job.

And so it goes... Still another improved product, still another use for this versatile modern metal. The result: everybody gains by production from Canadian smelters that already account for a quarter of the world's primary aluminum.

 Talks about:
EXTRA MONEY—
 would it help you
RIGHT NOW?

This is the time of the month when bills come in bunches. Our own experience is that the postman occasionally brings a few too many notices, but there just isn't enough in the pay envelope to cover every bill. If you are in the same fix, then... how would you like to get your cleared away? Well, you can—with a Niagara loan. We've a choice of loan plans at Niagara and many people can borrow up to \$1500. Payment plans, up to 24 months, give you time to get back on your feet. Your family is protected because your loan is covered by a life-insurance policy, that costs you not one penny extra. But that's not the only plus you get at Niagara for if you compare, you'll find that on many amounts our rates are lower. A Niagara loan is a clean-cut way of looking after too many bills instead of just worrying about them. If a Niagara loan would help you put your budget back in shape... just drop in or call.

Hospital presented with cheque

Presentation of a cheque for the purchase of a clock for the hospital case-room was made last Wednesday by Past-Honored Lady M. E. Ollerich of Royal Purple Lodge, Kelowna, No. 56. The first Wednesday in June of each year is Royal Purple Day throughout Canada, when a charitable donation is made to a worthy cause. Wednesday's presentation was made to Miss E. I. Stocker, and accepted on behalf of the hospital board.

Army man's nuptials in England terminate pen-pal romance

WINFIELD — A pen-friendship that began two years ago ended romantically in England last month when Miss Dorothy Isabel Taylor, of Bolton, England, became the bride of Pte. Peter John Winsdon, son of Mr. and Mrs. Peter John Winsdon, of Okanagan Centre.

The ceremony took place in St. Columba's Church, Ripley Street, Bolton, Father Sheahan conducting the service. A reception followed at the Firwood Hall Hotel, after which a short honeymoon was spent at St. Anne-on-Sea.

Miss Taylor was a member of the St. Columba's Church for twenty years, and since leaving St. Mary's School, has been a shop assistant, her last appointment being department manager at the Bolton Co-operative Society.

The groom is a Londoner by birth, being born in North Kensington, though it was from a farm in Abingdon, Berkshire, that he immigrated with his family, which included four brothers and a sister.

He has served with the 1st Commonwealth Division in Korea, and served for six years with the Westchester Regiment. In March, 1954, he enlisted in the Royal Canadian Army Medical Corps and intends to make this branch of the services his career, and hopes finally to work in the medical laboratories.

On termination of his leave early this month, Mr. Winsdon returned to Canada to undergo further training courses at Camp Borden. As soon as his permanent posting comes through his wife will join him.

Many members and friends danced to the music of Bert and Vera Hill and the "Commodores," and during the evening H. K. Hume introduced His Worship Mayor and Mrs. Ladd and Commodore and Mrs. T. C. McLaughlin. Mr. Hume extended to the Commodore the best wishes and assurances of continued support from all members.

Commodore Moss and Vice-Commodore and Mrs. Paul Garrett welcomed from Chelan Yacht Club, Rear-Commodore and Mrs. Jud Ribelin also were honored and a yacht club was presented to Mr. Ribelin in appreciation, and for "bringing the good ship into snug harbor."

A delicious cold supper was served during intermission, and dancing was resumed until 2:00 a.m. Table centres were flat bowls with floating blooms of peony, snowball or lilacs, and baskets of flowers were placed on window ledges and on the bandstand. The mayor's table was centred by a black, irregular container flanked by yellow tapers, and the flowers were mauve and yellow iris and sweetpeas.

The wedding will take place on Monday, July 2, at 2:30 p.m. in First United Church, Kelowna, the Rev. D. M. Peck officiating.

 Canadian Press Staff Writer

The decor of a fragrant little Montreal flower shop is in two shades of blue. But you can't say the same for the proprietor.

Marie, shyest of the four remaining Dionne quintuplets, fairly sparkled for the movie cameras, turned on her again to record the official opening of her flower shop in the heart of Canada's largest metropolis.

"I have never seen Marie looking so happy," said L. M. Edwards, the girls' financial advisor. Marie's business venture is the first of any of the quintuplets since they received their \$1,000,000 fortune on their 21st birthday.

It came just 10 days before the quint's 22nd birthday May 28 and won the best wishes of thousands, and she again to record the official opening of her flower shop in the heart of Canada's largest metropolis.

The florist shop is the realization of a dream Marie has had for many years. But she didn't get it via the "primrose path."

The death in 1954 of her sister Emilie—the two were always close—affected her deeply. Twice she entered a convent to become a nun but fate, or call it what you will, would not have it so.

"Emilie and I took courses in flower arrangements and dreamed of the day when we could open our own shop," Marie said. Yvonne, Cecile and Annette joined the opening celebration and, although only in name, the fifth sister was there too.

Marie named her shop Salon Emilie.

SUMMER RETREAT
 This is the month that summer cottages come to life. As the last traces of snow disappear from the woods, the annual event of opening up the cottage is performed by thousands of Canadians.

Brooms and scrubbing brushes play their part but the magic wand which restores summer sparkle is a paint brush.

If the linoleum on the floor looks shabby, yet is still in tolerable condition, it can be given a coat of color. A mottled effect will make less obvious the inevitable dirt and sand tracked in from the beach.

The effect can be achieved by dipping a brush in paint and tapping it with a stick instead of smoothing it across the floor.

Looking for make-shift furniture? Two painted orange crates set side-by-side in the bedroom make an excellent dressing table. A fully skirted tacked around the edge will make any resemblance to an orange crate purely coincidental.

Disguised with paint to blend with the rest of the furniture, the crates will also make ideal end-tables for the living room.

If not already an avid do-it-yourself fan, the cottage is an ideal place to test creative genius. It results are less than perfect, who cares?

JUST TALKING
 Mrs. H. Small, a scholarship winner in each of her five years in medicine, has won the 1954 gold medal for highest standing in the annual examination at the University of Manitoba.

One of six women in a class of 65, Mrs. Small plans to study psychiatry at the University of Victoria, and the wedding will take place in the Church of the Immaculate Conception, Kelowna, on June 30.

Outline of outstanding work W.I. groups doing in province given at convention

Mrs. R. C. Palmer, officially representing Kelowna Women's Institute at the 13th biennial convention of B.C. Women's Institutes held at UBC, was appointed a director on the provincial board, following many years as provincial convener of agriculture.

Delegates from all parts of the province were greeted by Dr. J. K. Friesan, director of university extension, and by deputy minister of agriculture William MacGillivray, both of whom stressed the importance of W.I. work.

Provincial president Mrs. A. A. children alive by supplying milk. Mrs. Shaw, who presided over the session, thanked the two speakers on being educated to help them. She said the delegates, and paid herself by learning hygiene and agriculture to her board of directors.

Touching on various aspects of Institute work Mrs. Shaw mentioned Lynn Webster and Edna Aitken as winners of W.I. Memorial scholarship. Tom Windt received the agriculture bursary.

Mrs. Stella Gummow, superintendent of W.I.'s said that the number of Institutes in the province now numbered 241, and that this would mean an increase in membership of 6,000,000 women.

CITIZENSHIP PANEL
 During a citizenship panel, which discussed the meaning of citizenship, several new Canadians and Canadians-to-be, told of their problems. Dr. J. Richter, found on his arrival in Toronto, that there was no mixing with, or employment with Canadians. He moved to B.C., where he is happy and working toward his degree in agriculture.

An Austrian, Miss A. Leonor, whose home was destroyed during the Russian occupation of Vienna, has two ambitions, medicine and theatre, and with her mother, she moved to B.C. in search of a solution to her problem. At present she is an X-ray technician in the cancer clinic. She will become a Canadian when she establishes her roots.

Mr. Mason, an Englishman who arrived eight years ago is at present active on the Canadian citizenship council, and has found friendliness and hospitality in Canada.

J. Kaliski, a political refugee from Poland who had a career in the lumber business here, has two sons and prizes his Canadian citizenship for the feelings of love and gratitude, and the freedom and security he has found here.

Lyle Wicks extended greeting to the convention on behalf of the government at the complimentary banquet given one evening, and paid tribute to Women's Institutes for the manner in which things get done, and urged the delegates to keep on "pushing."

Mrs. W. A. C. Bennett suggested that Institutes throughout the province compile thumbnail sketches of their communities, which, plus favorite recipes, might be compiled into a B.C. cook book.

VILLAGE HISTORIES
 In this connection Archivist Ireland, who is the gathering on the preparation of village histories, and stressed the necessity for sound judgment in utilizing not only the vital information needed to make a history chronologically correct, but also the social history.

C. W. Weeks, of BCTF, introduced by Mrs. Palmer, gave an informative talk on the uses of surplus fruits and how they are being profitably used in the making of juices and pie fillings.

President Mrs. Shaw, in her address, welcomed Mrs. A. N. Berry, president of the Associated Country Women of the World, with which Women's Institutes are affiliated. In doing a reimbursement book to the incoming board, Mrs. Shaw said that there now are 84 life memberships, as well as an increase in general membership and in funds. She appealed to all Institutes to reserve their funds for Institute purposes.

Mrs. Berry, who comes from Australia, expressed pleasure at being able to visit British Columbia, and urged the women to extend their horizons, to improve conditions on the land and in farm homes, and to enlarge their knowledge of people of distant lands.

Lebanon, she said, has recently formed a welfare society to help its women to preserve food, to bring education to the communities and to set up shops in which to sell handicrafts, and also to teach them to make clothing. Trained personnel is needed there, she said.

As a result of Mrs. Berry's recent visit to the Gold Coast, a Women's Institute has been formed there, which has joined the ACCW. Overlapping in village work there is being corrected, and women of high repute are sent by the magistrates in an effort to overcome juvenile delinquency.

Finland has the oldest society of rural people in existence. Every home has a loom, and the housewife weaves all materials worn and used in these looms. Many holiday homes are run by the society to give rural women a holiday.

In East Africa, Mrs. Berry went on, women's organizations kept

aromatic compounds. In many cases medical scientists have been able to change schizophrenics from chemically ill to normal.

Aquatic auxiliary reports on tea, fashion show

Reports given at the recent meeting of the Aquatic Auxiliary included those of the annual fashion show and tea, and Lady-of-the-Lake contestants. Mrs. H. Schuman, chairman of the Queens' Committee presented the list of the contestants chosen to date, as follows: Ladies' Auxiliary to the Aquatic, Marilyn Sladen; Junior Chamber of Commerce, Elsie Newick; Rotary, Marilyn Rolph; Rutland Board of Trade, Helen Leonard; Kiwanis, Ellen Cryderman; Kinsmen, Doreen Serwa; Lions, Beverly Pitt and Gyro, Myrna Maxson.

Mrs. Harold Long reported the sum of \$225 taken in at the fashion show and tea, with some expenses to be deducted from this amount. The balance will be used to purchase equipment and furniture, and Mrs. H. Van Montfort gave details of the prices of some of the items considered.

Mrs. S. A. Matthews thanked all who had helped so generously with the tea, adding that this year's annual event had proved as popular and successful as former shows.

Mrs. R. Dillabough reported on the last Regatta meeting, at which she represented the Auxiliary.

Mrs. F. Kelly introduced a new member, Mrs. Edna Taylor, who was welcomed by president Mrs. R. P. Walrod.

June 18 is the date set for the next meeting of the Auxiliary, at the Aquatic.

VISITS VALLEY ... Attending the radio convention held in Penticton last week, J. L. Sayers, general sales manager for CKWX, was a visitor in Kelowna and Westbank during the weekend.

HOME FROM EAST ... Mrs. W. J. O'Donnell, 379 Park Ave., who with her son, John, spent the past month in the Maritimes, her former home, returned to Kelowna last Thursday.

Engagement of local interest
 Mr. and Mrs. Alan Parker, of Ashcroft Manor, Ashcroft, announce the engagement of their younger daughter, Margot, to Dr. Ralph P. Kuipers, elder son of Mr. and Mrs. M. L. Kuipers, of Okanagan Mission. Dr. Kuipers is a graduate of Western States College of Chiropractic and Naturopathy, Portland, Ore., and Miss Parker will graduate this year in physiotherapy from the University of Alberta, Edmonton. The wedding date will be announced later.

Dr. Kuipers is a graduate of Western States College of Chiropractic and Naturopathy, Portland, Ore., and Miss Parker will graduate this year in physiotherapy from the University of Alberta, Edmonton. The wedding date will be announced later.

HOME FROM EAST ... Mrs. W. J. O'Donnell, 379 Park Ave., who with her son, John, spent the past month in the Maritimes, her former home, returned to Kelowna last Thursday.

Engagement of local interest
 Mr. and Mrs. Alan Parker, of Ashcroft Manor, Ashcroft, announce the engagement of their younger daughter, Margot, to Dr. Ralph P. Kuipers, elder son of Mr. and Mrs. M. L. Kuipers, of Okanagan Mission. Dr. Kuipers is a graduate of Western States College of Chiropractic and Naturopathy, Portland, Ore., and Miss Parker will graduate this year in physiotherapy from the University of Alberta, Edmonton. The wedding date will be announced later.

Recommend change in city's fire insurance program

City insurance committee has recommended change in fire insurance program by cancelling all existing policies and replacing them with three policies for equal amounts, each falling due one year apart. The change could be made immediately or as soon as a new statement of values is submitted following appraisal, the committee suggested.

There will be an overall reduction in rates, according to the B.C. Fire Underwriters, which could also be effective immediately, but subject to possible variation.

The committee, consisting of R. J. Sugars, G. Buttner and R. Whillis, saw no value in changing other types of insurance policies.

PLAN NUMBER R5B-975
FLOOR AREA 215 SQ. FT.
PLUS CAR PORT

THE BUILDING CENTRE (B.C.) LTD.

B-975

Designed for NHA approval, two bedroom full basement home designed for a narrow lot. The plan has a frontage of only 39 feet plus the car port. L shaped living and dining room off a spacious kitchen with a nook area makes up the rest of the well planned home. A full basement, with or without open stairwell, and plenty of room for rummup room, furnace and laundry. Working drawings are available from The Building Centre, 1240 W. Broadway, Vancouver.

DID YOU KNOW...

...if sawdust is spread on glue that squeezes from a joint, it will absorb moisture and help in the removal of the excess glue.

Simple operation to install drawer locks for privacy

If you have long wanted the privacy and security of a good lock on an existing drawer or cabinet door, just follow the step-by-step directions below.

A bored hole is just about all that is required to install a simple cylindrical lock on a drawer—boring a hole the right size. Clamp blocks on drawer front so the hole will not splinter out on the inside while you are drilling.

Slip lock into place from the inside and attach with screws. Strike plate may be attached to the underside of the drawer above the lock. Usually, however, tongue of the lock merely catches on stretcher.

Mortised-in chest lock requires a little more work. Hold lock flat on edge of door or lid and make pin-prick through centre of keyway. Then drill hole for lock with pin mark as centre.

Invert lock into hole and mark mortise lines with pencil, scratch awl, or knife blade. The reason for inverting: Most chest locks have the lock barrel off centre, so your mortise will be slightly wider on one side.

Following the guidelines, cut deep centre mortise with a chisel. Then mark and cut shallow mortise for the faceplate. Install the lock with screws; then install a matching strike plate.

finfill from a cigarette package and half fill with fine, dry sand.

Worth remembering . . . When you darn socks, use a flashlight as your darn egg. Slip the flashlight into the sock so that the head is under the part to be darned. Not only will you have a good working surface, but with the light on, you can see the job perfectly.

You can remove a broken bulb from a socket quickly and easily with a large cork. First, turn current OFF. Then press the end of the cork onto the base of the broken bulb and turn the cork counter-clockwise. That does it!

Here's a tip when you're spring cleaning. After rinsing or washing plastic lamp shades—don't wipe them dry! Rubbing plastic creates static which draws dust particles and makes them stick. Instead, let the lamp shade drip dry. This also applies to plastic curtains, utensils and kitchen chairs.

If you use pencil, ink, or any other marker for plant labels, just put a strip of Scotch tape over the name for permanent legibility.

On "salad days" this summer, never fresher greens for more than 15 minutes or they will become soggy. It also helps to add a few cubes of ice to the water. Green leaf salads should be dressed at the very last minute or they will be cooked by the vinegar. Even 5 minutes too soon makes a big difference. Other vegetable salads should be kept in dressing for at least an hour before serving.

When Bill accuses me of extravagance, I am often tempted to retort. Get your husband to bend the wires on the lower edge to form hooks. Then he can hang shears and small tools on them.

To avoid those smoking cigarette butts in your dashboard ash tray, just line the tray with a piece of

Around our house

By BILL & EILEEN LOVETT

And if hubby is complaining that once again the garage is littered with rakes and garden tools, here's a neat trick to keep all those tools in place. A four-foot length of wire fencing stapled across several of the studs on your garage wall forms a perfect rack for hanging garden tools. Get your husband to bend the wires on the lower edge to form hooks. Then he can hang shears and small tools on them.

To avoid those smoking cigarette butts in your dashboard ash tray, just line the tray with a piece of

Power grinder very useful piece of equipment besides sharpening

A power grinder in a home is grinding is done. This is a safety seldom seen a few years ago. In precaution. Another is some kind of general, tools were used so infrequently that they required sharpening only at long intervals. The man with some knowledge of putting the keen edges on dull tools did the job himself, on a grindstone or, on a grinding wheel. Others had the sharpening done professionally. Still others just kept on using the tools until they were unbelievably dull and, what is worse, surprisingly dangerous. As any craftsman can tell you, dull tools cause far more accidents than sharp ones.

GRINDER USEFUL
The power grinder for the handyman came into its own as more and more home workshops began to take shape. A grinder is not always considered one of the absolutely essential power tools for a man who is just starting a workshop. There are other power tools which he probably should purchase first. Once a workshop is rolling, a power grinder can become a very useful piece of equipment, and not only for sharpening. It is excellent for buffing, polishing, smoothing metal, removing rust and many other workshop tasks.

WHEEL GUARDS
Most grinders come equipped with wheel guards, so that the only part of the revolving wheel which is exposed is that where the actual wheel

Penticton group applies for membership in Shrine

PENTICTON—A meeting to organize a Shrine Club was held at the Hotel Prince Charles Thursday and application for a charter will be made to Gizeh Temple, Vancouver.

Lady-of-the-lake representatives attend parade

Lady-of-the-Lake Jerryl Wilson and Princess Louise Goldsmith showered smiles and waves on the 2,500 people watching the Summerland Golden Jubilee Celebration, in return for hearty applause.

Wearing their formal, the two young members of Kelowna Regatta royalty were fortunate that the rain held off for the duration of the parade, permitting them to sit on the neck of their top-down convertible.

Blair Peters, campaign manager for the Tourist Association, and Regatta program advertising, drove the young ladies to the celebration, which they attended in the convertible due to the impossibility of

Shutters cut from plywood add new charm to any home

Whether planning a new home or doing over the outside of your present one, shutters afford an interesting feature and add an air of charm.

Shutters may be for decoration only or may be hinged to open and close easily.

The simplest way to make shutters is to saw them from a sheet of half inch plywood. Thanks to water-proof glue construction, the plywood will stand up to the severest weathering.

Ideas for attractive window shutters may be clipped from magazines. Using a scaled grid, an outline of the shutter pattern can be drawn right on the plywood and cut out with a coping saw. Thin slats may be added to create many varied patterns, appropriate for a home in the city, country or at the lakeshore.

Steel kitchen snack bars do multiple duty. Not only are they handy dining tables, but also provide extra serving-counter space on special occasions.

NOTHING of yours need be LOST

Don't risk losing money on a holiday or business trip. Use travellers' cheques whenever you're carrying sizable sums. Travellers' cheques are negotiable anywhere and offer maximum protection. Better to be safe than sorry when the cost of safety is so slight. They're available at any branch of The Canadian Bank of Commerce.

STRAYED

You're taking expensive chances on having your money "stray" when you send it loose by ordinary mail. When sending money out of town or abroad, use money orders or foreign remittances. Whether you're sending one dollar or a thousand—by mail, telegraph or cable—your request will receive prompt and courteous attention at any branch of The Canadian Bank of Commerce.

OR STOLEN

If you leave valuable and important papers around the house or office you run a constant hazard of theft or loss—yet a safety deposit box can cost you less than 2¢ a day. Rentals from \$5 yearly. Ask for details at your nearest branch of The Canadian Bank of Commerce.

Rossland replaces Kimberley in international puck loop

SPOKANE, Wash. (AP)—Rossland, a British Columbia community rich in hockey history, has rejoined the Western International Hockey League, taking the place of the Kimberley Dynamiters.

The new league lineup was announced at the WIHL's annual meeting.

Dr. Joe Vingo of Nelson, B.C., was elected president of the league for increased limit on players in an unprecedented third straight year.

The league also voted to continue the neutral referee system, adopted a balanced 48 or 50 home-and-home schedule including an exchange ser-

ies with the Okanagan League and elected president of the league for increased limit on players in an unprecedented third straight year.

Kimberley's withdrawal from the league will be only temporary. The Dynamiters' wooden rink has been condemned by fire authorities, as of next January.

Rossland, eight miles from Trail, will be sending its first senior hockey team into action since 1938, although its skate history dates back 50 years. A nickname for the Rossland team will be decided by a poll of local fans.

PROVINCE PERSONALITIES

S. G. (Syd) Roberts, foreman of The Province Engraving Department and past president of the Vancouver Photo Engravers' Union, was born in Regina, Saskatchewan. He began his schooling in Regina, continued it in Winnipeg after his family moved to the big prairie city, and then completed it in Regina when his family moved back in 1935.

Strangely enough Syd's first job was not in the photo engraving trade (although his father was a photo engraver) but in the bakery business.

Then came the war and Syd enlisted in the Royal Canadian Corps of Signals and served with the Canadian 2nd Division in England, France, Belgium, Holland and Germany, winding up as a corporal.

He was discharged in August, 1945, and after a short stint with D.V.A. joined the Vancouver Engravers' staff where he remained for 5½ years. He joined The Province engraving department in December, 1950.

Syd, always interested in union matters, became an executive of the Photo Engravers' Union the same year and also served as a delegate to the Trades and Labor Council. He became vice-president of the Photo Engravers' Union in 1952 and president in 1953. He served in that capacity for two years.

Syd Roberts is still active in union affairs as a member of the Photo Engravers' executive and has been since May 20, 1955, foreman of The Province Engraving Department. He is one of the 500 Vancouver men and women who make up the working team producing The Province.

NOW!

YOUNG MEN WITH JUNIOR MATRICULATION

can get college education through this plan

In addition to the senior matriculation entry through the Regular Officer Training Plan, a limited number of qualified young men with Junior Matriculation can now go to College with all educational expenses paid by the Department of National Defence. Through this Plan . . . which applies to the three services . . . Junior matriculants attend either civilian College, or the College Militaire Royal de Saint-Jean, and receive Officer Cadet pay and allowances, free medical and dental care, and 30 days annual leave. In summer you train with the service of your choice: the Navy, Army or Air Force.

Your graduation leads to the Queen's Commission and a professional career in the service of your country. If you are between 16 and 20, physically fit and have either senior or Junior Matriculation, take advantage of this outstanding educational and career opportunity. Get the full facts. Fill in and mail this coupon today! Applications must be in by July 1st.

Plans moving ahead for power boat races in conjunction with regatta

A few grey hairs and worry wrinkles are in store for the power boat committee of the Kelowna Golden Jubilee Regatta association this year, as they make plans for the introduction of unlimited class boat racing in the Okanagan.

The big power wagons, well-known to racing fans all over the world for their participation in Gold Cup racing, present a number of difficulties in administration not experienced in the Regatta City previously.

Following a year of concentrated work, however, the big boys agreed to come to Kelowna, according to power boat chairman Harold August, asking only a small guarantee for expenses.

One of the main factors in their on the races. Telephones will also decision to come here was the agree- be hooked up from the pits to the ment between the American Power starting barge and the Yacht Club. Boat Association, and the Canadian Fencing, Policing, and restrictions Boating Federation to count the applying to the beach pit area were points earned in the Regatta-spon- left in the hands of an executive sored race on either side of the line.

Since the Gold Cup races, which occur following the water show, re- the grand stands all reserved seats, quire that the boats have competed with the last minute rush seats go- ing at a lesser price. All prices were will be a God-send to any boat left to the discretion of the regular which may have had troubles at the regatta meeting.

Discussion was favorable toward the establishment of a cup for the big boats, something distinctive, and embodying the Golden Jubilee spirit if possible.

The invitation to try for world speed records should be extended place on Saturday, August 4, with to the boat owners also, the com- \$25,000 in prizes.

The following week end, August 11, the boats will race here, and on August 18 they will race in Polson, Montana, before heading to Detroit for the Gold Cup Race.

The unlimited boats will race for \$1,000 in prize money, with each starter up to five boats receiving \$500 in expense money for crossing the starting line.

THREE HEATS
Plans to present call for three heats at 1:30, 2:30, 3:30 p.m. The three heats will have to be precluded by elimination heats in the event of more than six of the big craft entering.

Arrangements will have to be made to have the ferries alerted to stand clear when the heats are being run, since the course has been tentatively drawn up to begin at Manhattan Point, and proceed toward the shoreline at a point between the ferry wharf and the western bridge approach, turning in full sight of the Ogopogo Stadium stands, and heading back for Manhattan Point.

This will mean they will pass directly over the ferry course twice in the completion of each lap.

BOAT PITS
The pits for all boats this year will be on the beach south of the Aquatic, the only feasible place for the bigger boats to load and unload. Ramps will have to be laid on the beach to accommodate the semi-trailers that haul the four-ton power plants, and the mobile crane that is necessary to dunk them and lift them out of the water.

Biggest thrill for the general public will be the off-racing periods, when they will be able to look the boats over at first hand, examine them closely, and ask questions of the boat attendants. Many of the boats have received international press fame, and have been seen in news-reels and in magazine and newspaper pictures by Kelownians.

The limited class boats will be lowered into the water from the ramp and launched from the beach, while the unlimited boats will have to use the crane.

The buoys used for the smaller class of boats will prove to be too small for the sizzling speeds of the larger boats, chairman August pointed out, and arrangements will have to be made to the weather balloons to the buoys, painted a brilliant orange to attract the eye of the speeding boat jockeys.

The starting barge facilities at Manhattan Point were discussed in Thursday night's power boat meeting, and it was decided to approach Charles DeMara about obtaining the use of the drilling barge he purchased recently. A committee will look into the possibility of placing the officials on the "triangle" in the Aquatic pool.

Communications from the barge to the Aquatic and the pits will have to be by public address system, it was agreed, giving the people in the Ogopogo stands the opportunity to hear the starters, officials, and boats' crews talking back and forth, as well as hear the commentary.

She raised the window blind then opened the door!

Busy hockey executive and booster club in the Peach City have raised \$2,000 of the \$17,000 deficit on last year's Penticton Vees operation.

Not all was a garden or roses for these doing the collecting however, as evidenced by this little anecdote relayed from Warwickville:

A representative of a nationally-known product called on one of his customers to service her machine, and failed to raise anyone in the house after repeated knocking. Finally he turned to leave when he noticed he was being observed furtively from the upstairs corner of a curtain covering the door.

Quickly, he addressed the curtain corner and identified himself.

The door swung open, and the elderly woman spoke with relief. "Thank goodness! I thought it was somebody canvassing again for those Vees!"

Vernon meets Orioles Wed.

Vernon Silver Stars will play an exhibition baseball game against the Kelowna Orioles, at Elks' Stadium here Wednesday night at 6:30.

Both the Orioles and Silver Stars hold down third spot in their respective leagues, the latter playing in the Interior League, while the Orioles of course are in the Okanagan Mainline division.

Although no official word from coach Hank Tostenson has been received, probable starting pitcher will be Al Schaeffer who has two wins for six starts.

The game will provide baseball fans with some action, after the Princeton-Kelowna doubleheader was washed out, as was all Valley ball.

Soccer cup play Comerck boxla loop planned resumes Sunday

The soccer cup ties in the valley were one of the few sports not affected by the downpour, since they had previously cancelled to permit players to travel to the coast to watch the exhibition soccer game being played there.

Cup play will resume next, with Armstrong hosting the Kelowna Hot-purs, and Vernon hosting the Penticton Queen's Park Rangers. Winners of these two matches will meet in the city of the team having the highest goal average for the first and second round of play.

The call is out for senior lacrosse players to dust off their sticks and show up at the Memorial Room of the arena tomorrow night at 7:30, to discuss the formation of a commercial league.

Local lacrosse officials feel that there should be enough interested players in the city to warrant the scheduling of regular weekly play for a three-team commercial league.

The senior league will be the forerunner of a juvenile-junior league, which will also be formed, and play on their own nights if the entries are sufficient, or on the same nights as the seniors should the entries be fewer.

The decision to form the senior league came about as the result of much discussion by the Bruins' executive, who have been looking into the formation of the league for the youngsters. They have enrolled a good number of boys so far to start a strong minor league, and hope to have some more applications before they get under way.

Arrangements have been made to have the arena one night per week for minor lacrosse, but arena man-

ager Percy Downton said he would give the senior boys a night if they got sufficient numbers out to have an active league.

Since there were almost 30 men interested in playing for the senior Bruins in the Valley league, it was felt there would be no trouble augmenting this number by 10-12 older players who were not interested in the senior "B" competition, with its attendant travelling, but would play in a local league.

Both leagues should be formed this week, with the starting dates to be announced, the spokesman for the executive said.

All ball games washed out

As a result of yesterday's inclement weather, there were no baseball games in any of the interior leagues.

A Kelowna-Princeton double header was washed out as was a Summerland-Penticton contest.

Two double headers in the Interior league, Merritt at Rutland and Vernon at North Kamloops were also postponed. All of these games will be played at a later date.

In Thursday's Courier we listed the standing as Penticton and Summerland tied for first spot in the OMBL. Our mistake . . . we gave the Red Sox an extra win instead of a loss. Penticton now is tied with Kelowna for third place, with Summerland on top of the heap.

World tournament players' salary prospects good, says CAHA official

Prospective members of the Canadian all-star world championship hockey team will not be too disappointed when arrangements are finalized for the four-month pre-tournament training program, according to Dr. M. J. Butler, Okanagan representative of the CAHA.

Butler was commenting on a statement by Vernon Canadians coach George Agar that a married man could not afford to take three or four months off to train for the world tournament series. For this reason Agar professed to be uninterested in the position of coach.

"I talked to Agar this afternoon," that some large Canadian firm might "and told the Courier on Fri- se fit to underwrite the expenditure of the proposed plan, I think he's changed his mind."

Of the \$90,000 allotted for the proposed trip by mid-July. This is world series, said Mr. Butler, around \$15,000 will go toward the training camp in Vernon. It is understood \$12,000 will go toward salaries for the 30 players chosen to attend the camp. The team will later be cut to 18 players, who will play exhibition games across Canada.

One month before the world hockey series in Moscow, they will leave for Europe, where they will play another series of exhibition games against European countries, under their rules.

The CAHA hopes to raise \$15,000 on exhibition games in Canada, leaving a net cost of \$75,000. Dr. Butler said this money would be raised by forming a committee which will be headed by national sports figures, with the possibility

Pollard still opposed to Kootenay swing

The shuffle in the WIHL has filled the Kootenay executive with the hope for continued inter-league exchange of games with the OSHL, according to press and radio releases made by the executive of the league across the mountains from the Okanagan.

Inclusion of the Rossland entry, and the withdrawal of Kimberley would bunch the Kootenay spots, leaving Spokane as the longest road trip for an Okanagan team, the WIHL, exec spokesman pointed out.

A. R. Pollard, past president of the Kelowna Packers, stated that the local club would not be in favor of exchange playing under any circumstances.

Rossland team recently announced their choice of Mike Bucklin for coaching duties and Rossland replaces Kimberley in the WIHL. Dynamiters threatened to fold at least once during the season. It was also the longest road trip, and most severely criticized by Okanagan players when they swung through on their loop of games.

Kimberley's ice sheet was considered to be in favor of the small- or town players, with its curtailed length cramping the style of some of the faster, all-out skaters.

LEAGUE MEETING
The general feeling of the OSHL during league meetings while play was still going on was against the Kootenay swing, but no definite resolution for or against the move will be taken until the league meeting, the date of which has not been announced.

Mr. Pollard said, in refutation of the stance that the stumbling block of the long road journey had been removed, that the worst feature of the trip was not the travelling, but the fact that one team's absence from the OSHL split up the balance of the schedule here, and provided uneven game dates.

Bucklin, previously suggested as a possible choice for western coach of the all-star world championship entrants next year, was the head coach of the Czechoslovakian hockey loop for some years, and was also coach of the Trail Smoke Eaters in the WIHL. Bucklin quit his active hockey playing in 1938.

Elmer Sherman Loeth was fined \$15 and costs, after pleading guilty to a speeding charge. He was pulled off exceeding 30 mph on Pendoz St.

you'd find MORE at
a duck dinner!

Take all the impurities from a pig of Tadanac lead and a slab of Tadanac zinc. You wouldn't have enough foreign material to make five BB pellets.

You'd find more shot in a three-pound mallard!

A pig of Tadanac lead weighs 100 lbs.; a Tadanac zinc slab, 56 lbs. Yet their combined 156-lb. weight contains impurities totalling less than 1/10 of an ounce.

Metals in today's markets must meet exacting conditions. Exceptional purity is a common requirement; the complete removal of certain minor metals or alternatively the addition of others to meet specific conditions is often necessary.

The problem of matching the product to the market is constantly under study by Cominco's Sales and Research divisions. Cominco engineers are glad to work with customers to answer their needs—and, if necessary, "tailor-make" a metal or an alloy for their use.

Mobile zoo here

Dr. Ballard's mobile zoo, featuring monkeys, raccoons, rabbits, mice, bobcats, various types of birds, rats, guinea pigs, mink, owls, turtles, and numerous other birds and animals, will be in Kelowna today and Tuesday at Gordon's Super Valu parking lot.

Mobile zoo is making its final appearance in the Okanagan. It is scheduled to appear at various prairie points after leaving the valley.

Eight candidates entered in lady-of-the-lake contest

Eight youthful aspirants have been selected in Kelowna and district for the crown now held by Lady-of-the-Lake Jerry Wilson, the winner having the honor of reigning over the Regatta City's Golden Jubilee Regatta celebration.

The candidates were chosen with an earlier deadline than usual, in order to have them prepare for the pageant planned by Mrs. James Logie, wife of the Regatta secretary.

The Canadian Legion has not announced the name of their entrant, but it is understood they are planning to enter, making an anticipated total of nine candidates.

The Lions' prospect is 17-year-old Beverly Pitt, a popular young athlete and girl about town, current holder of the Augie Caneone Award as the most outstanding athlete and junior citizen of Kelowna. An enthusiastic skater, she plays softball, soccer and basketball, and engages in track events. In addition to her sports, Miss Pitt calls copper work and sewing her hobby, and she is well known for her work conducting the Teen Town radio program on the local radio station every Saturday afternoon.

Another 17-year-old is Eileen Cryderman, the Klwanis' entry, an active young sportsman. Miss Cryderman is well known in basketball circles, and is an enthusiastic curler, skater and swimmer, in addition to playing soccer. President of High Y, her hobby is also sewing.

Another 17-year-old is Eileen Cryderman, the Klwanis' entry, an active young sportsman. Miss Cryderman is well known in basketball circles, and is an enthusiastic curler, skater and swimmer, in addition to playing soccer. President of High Y, her hobby is also sewing.

Another 17-year-old is Eileen Cryderman, the Klwanis' entry, an active young sportsman. Miss Cryderman is well known in basketball circles, and is an enthusiastic curler, skater and swimmer, in addition to playing soccer. President of High Y, her hobby is also sewing.

Farmers can improve winter feed supply by planting annual crops

To compensate for the short hay and silage crops in the Okanagan and mainland, farmers can still improve their winter feed reserves this year through production of annual crops.

Providing soil moisture conditions are favorable many annual crops can still be planted which will produce hay, silage and fall pasture.

Oats can be seeded up to mid-July in the interior to produce a late crop of silage or fall pasture. At these late dates of seeding, although oats will normally head out before heavy fall frosts, they will probably not fall out. Nevertheless, they will give a satisfactory yield of forage which can be stored as silage. Seeding of annual rye grass at 10 to 15 lbs. per acre with the oats will provide additional bulk in the harvested crop.

Early maturing varieties of corn, good seeded and recommended for can be seeded up to June 20 and still produce a good tonnage of forage.

Navy pictures on display this week

A display of 80 photographs taken by RCN photographers all over the world on a wide diversity of subjects will be on exhibition in Bennett's Hardware Store windows, Wednesday night and all-day Thursday.

The exhibit, later to tour other Canadian centres and naval bases, emphasizes the quality of work and talent of the navy's official cameraman. Included in the display are pictures taken in the course of service duty at sea, ashore and in the air and others of the "busman's holiday" variety taken with personal equipment during off-duty time.

A total of 165 entries were received from photographers on ships and establishments ashore in Canada. They were judged by a board composed of the noted industrial photographer, Malak, of Ottawa; Jack Van Dusen, Ottawa bureau picture editor of the Canadian Press; and H. W. (Bert) Homes, director of photography for the department of

national defence.

The board selected 85 to be hung in the Little Gallery.

In addition to the nautical theme, a pleasing variety of topics will be exhibited, much of it taken in spare time ashore, during foreign cruises.

Five were given first-class honors, five awards of merit and eight honorable mention.

Those obtaining first-class honors were:

"Sand Blasting" by Ldg. Sea Arthur, Estensen, Ottawa, serving at naval headquarters.

"Herbert L. Rawding," a four-master by Lt. (SB) John M. Turner, Edmonton, serving at the RCN air station, Shearwater, N.S.

"Power Station" by PO Kenneth White, Ottawa, serving in the Montreal area.

"Final Tack" by AB Bill Ball, another Ottawa man at headquarters.

"Journey's End" by PO Kenneth Martin, Salvador, Sask., who serves in HMCS Naden, the RCM Barracks in Esquimalt, B.C.

"The Bennett regime was ready to let the corporation build the dam, control the river, all for one-million dollars per year. After the intervention by Ottawa was taken, a survey was made and it was found that the resources in electrical energy, when developed, will be worth 300-million dollars per year. And Gagliardi, one of the early backers of the proposed agreement said, 'We can't use all of the power here'."

"The London Times is quoted as saying, 'There appears to be a conspiracy for all of the world to grab the natural resources of Canada.'"

"I accuse this government of acting in such a way," charged the speaker, "that if what we do in B.C. were done on a national scale, we would have uncontrollable inflation."

He said in a recent trip to the Peace River he could not even buy a Vancouver newspaper. All the papers there came from Edmonton, as did the mail and all supplies.

"Premier Bennett said the PGE made a profit of 250-thousand dollars last year. This is a misrepresentation," charged the party-leader.

"At the present rate, the PGE is losing approximately three and one-half million dollars per year. But we do not mind spending this, as the expansion projects of the railway will open much new and valuable territory."

"Last year, more than one half of the total income in this province came from the forest industry," he pointed out.

Preservation and operation should be such that the forests be preserved for all time and for future generations. Yet, the present government is alienating a large part of this natural resource, granting licences to American interests. Premier Bennett has said that this alienating was a policy of the previous government, under Byron Johnson.

Mr. Laing pointed out that there was some, but very little, alienating under the previous government.

"In 1945 when Gordon Sloan set up a commission to look into the forest industry, timber was not considered 'gold on the stump' as it is today," the speaker asserted. "Today there are 23 separate forest management licences out. These comprise more than seven-million acres of the best timber in B.C. And \$457 per thousand board feet."

Last year the government received less than 900-thousand dollars from American interests cutting timber in B.C. That was the total profit from those 7-million acres. In shows that the Navy's cameraman, photography is both a vocation and avocation.

A total of 165 entries were received from photographers on ships and establishments ashore in Canada. Winfield W.I. delegate gives parley report

WINFIELD—At the last Women's Institute meeting Mrs. M. Sommer, who was the delegate to the annual rally held at Okanagan Falls, gave a full and interesting report. Plans were discussed and made for the 40th anniversary party held at Okanagan Centre on Friday. This was followed by a discussion of the Red Cross swimming classes, and Mrs. J. Shaw asked to take over the swimming registration. Miss Evelyn Hilday was appointed swimming instructor for this season. Times of the classes have not been drawn up.

The Agricultural and United Nations committees were hostesses. Miss Dorothy Britton, who is in charge of home economics in the fruit and vegetable processing laboratory at Summerland, showed some interesting slides, and spoke on what uses can be made of the processed Okanagan fruits. Refreshments were served at the close of the meeting.

Home from Seventh-day Adventist college in Washington are Teddy Wageman, Berlie Rieburg and Mr. and Mrs. Ed Siemens.

Mr. Gerald Bowman of Quesnel visited at the home of his sister and

national defence.

The board selected 85 to be hung in the Little Gallery.

In addition to the nautical theme, a pleasing variety of topics will be exhibited, much of it taken in spare time ashore, during foreign cruises.

Last year the government received less than 900-thousand dollars from American interests cutting timber in B.C. That was the total profit from those 7-million acres. In shows that the Navy's cameraman, photography is both a vocation and avocation.

A total of 165 entries were received from photographers on ships and establishments ashore in Canada. They were judged by a board composed of the noted industrial photographer, Malak, of Ottawa; Jack Van Dusen, Ottawa bureau picture editor of the Canadian Press; and H. W. (Bert) Homes, director of photography for the department of

national defence.

The board selected 85 to be hung in the Little Gallery.

In addition to the nautical theme, a pleasing variety of topics will be exhibited, much of it taken in spare time ashore, during foreign cruises.

Five were given first-class honors, five awards of merit and eight honorable mention.

Those obtaining first-class honors were:

"Sand Blasting" by Ldg. Sea Arthur, Estensen, Ottawa, serving at naval headquarters.

"Herbert L. Rawding," a four-master by Lt. (SB) John M. Turner, Edmonton, serving at the RCN air station, Shearwater, N.S.

"Power Station" by PO Kenneth White, Ottawa, serving in the Montreal area.

"Final Tack" by AB Bill Ball, another Ottawa man at headquarters.

"Journey's End" by PO Kenneth Martin, Salvador, Sask., who serves in HMCS Naden, the RCM Barracks in Esquimalt, B.C.

"The Bennett regime was ready to let the corporation build the dam, control the river, all for one-million dollars per year. After the intervention by Ottawa was taken, a survey was made and it was found that the resources in electrical energy, when developed, will be worth 300-million dollars per year. And Gagliardi, one of the early backers of the proposed agreement said, 'We can't use all of the power here'."

"The London Times is quoted as saying, 'There appears to be a conspiracy for all of the world to grab the natural resources of Canada.'"

"I accuse this government of acting in such a way," charged the speaker, "that if what we do in B.C. were done on a national scale, we would have uncontrollable inflation."

He said in a recent trip to the Peace River he could not even buy a Vancouver newspaper. All the papers there came from Edmonton, as did the mail and all supplies.

"Premier Bennett said the PGE made a profit of 250-thousand dollars last year. This is a misrepresentation," charged the party-leader.

"At the present rate, the PGE is losing approximately three and one-half million dollars per year. But we do not mind spending this, as the expansion projects of the railway will open much new and valuable territory."

"Last year, more than one half of the total income in this province came from the forest industry," he pointed out.

Preservation and operation should be such that the forests be preserved for all time and for future generations. Yet, the present government is alienating a large part of this natural resource, granting licences to American interests. Premier Bennett has said that this alienating was a policy of the previous government, under Byron Johnson.

Mr. Laing pointed out that there was some, but very little, alienating under the previous government.

family, Mr. and Mrs. P. J. Ratcliffe over the weekend. He also attended the Whizbang reception held in Vernon.

R.H. Barry Sr. is spending a few days in Vancouver.

At the last PTA meeting, held at the school, there was a good turnout and plans were made to hold the annual picnic June 18. The main item of the evening was an interesting talk by Joe Billy, vice-president of Rutland school. He spoke on counselling school children. At the end of the meeting refreshments were served.

At St. Edward's Church, last week, a very successful mission was held for the week by Missionary Father Hennessy.

A successful community picnic was held under the auspices of the community club recently. The people met at the community hall then motored to the Joe Rich valley. Everyone enjoyed the outing. Children and adults alike were kept busy with games and contests. A treasure hunt was also held. At a date to be announced, the club is planning a weekend camping trip. All that is needed to make it a success is full camping equipment, gas for approximately 150 miles, fishing equipment and lots of people.

The meeting of the hospital auxiliary was held at the home of Mrs. Del Reising, Mrs. B. Ramey and Mrs. J. A. Green were hostesses.

The report was made on the success of the stall at the hospital fair and with donations since received, the auxiliary will have made about \$100. The buying committee under Mrs. B. Ramsay was asked to contact the hospital to see what they needed most, in that price range.

It was decided to recess for a couple of months, and the next meeting will be held at the home of Mrs. B. Ramsay August 7. At the close of the meeting refreshments were served.

MECHANICAL DIGGER

MALVERN SQUARE, N.S. (CP)—Agriculture department officials predict that a machine to dig strawberry plants will be found on many farms in the next few years. Oils Chute, strawberry grower here, developed the machine from pictures of a device used in the United States.
